

# Mission Status Report 166

Reference Period: 01-30 November 2020

sentinel-2

→ COLOUR VISION FOR COPERNICUS

## Mission Status

- Despite the critical situation in Europe due to the COVID-19, important efforts are being made to ensure the continuity of the Sentinel-2 mission operations, which up to now remain nominal.
- The Copernicus Sentinel-2 mission is nominally performing global and systematic acquisitions.
- The mission acquisition plans are regularly published at:  
<https://sentinels.copernicus.eu/web/sentinel/missions/sentinel-2/acquisition-plans>
- A routine decontamination activity of the Copernicus Sentinel-2B MSI is planned to take place over 24 hours between 16 November 10:00 and 17 November 10:00 UTC (corresponding approximately to the period between absolute orbits 19310 to 19324).
- Level-1C top-of-atmosphere reflectance products are available in all Copernicus Data Hubs, i.e. Open Access Hub, Services Data Hub, Collaborative Data Hub and International Hub. Older products are available offline as detailed [here](#).
- Level-2A surface reflectance products since 13<sup>th</sup> of December 2018, and over the Euro-Mediterranean region since 26 of March 2018, are available in all Copernicus Data Hubs.
- The 2019 Copernicus Sentinel Data Access Annual Report has been published and is available [here](#).
- Information on data quality is available in two reports, one for [L1C products](#) and one for [L2A products](#).
- Since the 04 February, the Copernicus Sentinel-2 products used the new Processing Baselines 02.09 for Level-1C and 02.14 for Level-2A products. More information available [here](#).
- Some Data Hub anomalies and outages impacted the availability of the data access during the period. Please refer to the [news](#) page for the list of the single events.
- Due to a ground segment contingency that occurred on 24 November, the nominal availability of several Copernicus Sentinel-2A products from sensing orbit 28336 to 28338 and Copernicus Sentinel-2B products from sensing orbit 19427 to 19430 was prevented.
- The following articles related to Sentinel-2 were published during the reporting period:
  - [Sentinel data enables new system for agricultural monitoring in Poland](#)
  - [Copernicus DEM 30 metre dataset now freely available](#)
- Sentinel-2 videos and images have been published and are available [here](#).

## Outlook

- Start of the geometry-refined production using the Global Reference Image (GRI) and Copernicus DEM at 90 m resolution by December 2020.
